

THE FREEDOM TO BE WARM

DUAL 30-POUND PROPANE TANK WARMERS

Python's Dual 30-pound Propane Tank Warmers protect the regulator from freezing and increases propane life in cold environments. The tank warmer is maintenance free with a simple plug-and-play electrical power system. Eliminate the stress of freezing during your winter recreational activities with the simplicity and reliability of a propane tank warmer.

ADD PROTECTION + EFFICIENCY

The Dual Propane Tank Warmer is not only a cover to protect your tanks and regulator from road grime, but is also equipped with a heating element. The heating element hugs the tanks, providing optimal warmth to the propane and the area around the tanks. Warm propane will keep the regulator from freezing and provide a cleaner burn for appliances.

RESIST THE ELEMENTS

This cover has a robust flexible PVC coating that is UV resistant and flexible, yet has the strength to handle the ruggedness of Mother Nature.

ELMINATE THE HEADACHES

Know you have the freedom to be warm while on the ice relaxing, enjoying fishing, at the campground, or coming back from a long day of trail riding. Always have a warm camper to relax in. Easy to plug into the 120VAC outlet and walk away, spending more time enjoying your hobbies.

CHOOSE YOUR FIT

- **PTW-302** is a one-piece full cover with heating elements. Designed to replace the plastic shroud.
- **PTW-302-L** is a one-piece full cover with a flip lid for easy access to the regulator. Also includes heating elements and is designed to replaced the plastic shroud.
- **PTW-302-NL** has a wrap-around design for tanks located inside tank boxes. A heating element inside the cover will keep the tanks warm during operation.
