

IMPECCABLE AIR, FLAWLESS FINISHES

USE CLEAN COMPRESSED AIR IN YOUR SHOP
TO DOUBLE THE LIFE OF YOUR EQUIPMENT
AND ELEVATE YOUR FINAL PRODUCT

WHY CLEAN, DRY AIR?

Compressed air is a versatile utility in the wood working and finishing industry. From protecting your air assisted airless pump to a flawless final coating, clean compressed air is required throughout the process and plays a vital role in your shop by improving the final output and decreasing operational and maintenance costs.

Often overlooked, is the cleanliness of the air being used. Compressed air contains the dirt, oils and water that exists in the ambient air inside your shop. As this air is pulled into the compressor, the contaminants and moisture build up in the tank and travel through the air line. These contaminants can damage your equipment and the final product itself.

WHY DIRTY AIR IS BAD:

- Dramatically reduces the lifespan of your equipment from corrosion and sediment build-up
- Impacts the final finishes on your product by propelling dirt and oils onto the wood
- Wastes energy and increases operational costs through the loss of equipment efficiency

- ① WATER SEPARATOR FILTER ④ AIR PRESSURE REGULATOR
② OIL COALESCING FILTER ⑤ MOUNTING BRACKET
③ AUTOMATIC DRAINS ⑥ ANTI-CORROSIVE FINISH

WHY TSUNAMI?

Selecting the proper air treatment products for your shop is essential in avoiding the pitfalls of bad air. Many cheap filters and dryers do not effectively remove all the contaminants and may require constant servicing or replacement.

With Tsunami, you can expect the clean, dry air your shop needs to run effectively AND enjoy minimal servicing with years of performance.

✓ HIGHER QUALITY, LONGER LIFE

Experience a higher quality product that cleans the air and lasts longer than cheaper filters.

✓ HASSLE-FREE SERVICING

Built to service quickly and efficiently to increase productivity and decrease downtime.

✓ VERSATILE

Our technology is easy to mount, install, and operate so you can place it wherever your operations require improvements.

50 CFM FILTER PACKAGE
#21999-0253

FILTER PACKAGE

All 2-stage filter packages feature a water separator, oil coalescing filter, and mounting bracket; some available with air regulators. These packages enhance the cleanliness of your air by pulling out water, oils, and pesky contaminants.

Tsunami Filter Packages are available from 20 CFM to 120 CFM to meet your air demand.

PURE-7 SERIES DRYER
#21999-1140

PURE SERIES DRYERS

Tsunami's PURE Dryer provides clean, dry at the point-of-use. Our PURE line is simple, easy to install and will remove liquid water, oils, particulate AND remaining humidity found in the air line.

Our air dryers guarantee to enhance your operations, final product, and shop efficiency when installed to where it's needed most.

"GRADE D" BREATHING AIR PANEL

BREATHING AIR

Tsunami Breathing Air is essential for the health and safety everyone working in the shop. Whether wood shavings are flying or finishing spray is being applied, having clean air is vital for respiratory health in these conditions.

Meeting OSHA Grade D breathing air requirements with the help of a Breathing Air System means you can rest assured each breath is safe in the work environment.
